

SPECIAL LUNCH & LEARN WORKSHOP

Current Trends for Success in Bundles and Strategies for Financial Changes: Orthopedics and Beyond

FRIDAY, OCTOBER 19TH 12:20 PM - 2:05 PM

MONTREUX 1, SWISSOTEL, CHICAGO

The value based care landscape is rapidly changing. Implementing a bundle requires an investment in time, alignment and resources of all providers who care for bundled patients. This includes physicians, nurses, social workers and administrators. The discipline necessary to be successful at bundled payments enhances the financial viability of hospitals, ASCs and clinicians by benefitting the entire TJA product line, and most importantly, these strategies result in improved outcomes and better care for our patients, which is the ultimate goal of all providers.
